

Presentation skills

Bring your presentations to the next level.

Giving an effective presentation is a vital business skill for any professional today. It is an opportunity to explain your ideas, engage with your listeners and win them over to your cause. Yet for most of us, speaking persuasively in front of an audience can be nerve-racking. Like any skill, it takes practice, guidance and proven techniques to master. That's what this course is all about.

Course description

What will you learn

Your ideas are powerful. But to put those ideas into practice, you need to gain the support of others. That's why presentations are so important. By creating a compelling case for your ideas, you inspire others and motivate them to buy into what you are proposing. Often, it's not about what you say, it's about how you say it.

Your audience is made up of people just like you. We all long for authenticity and connection. By learning to harness the human emotional aspects of communication, you become a more persuasive presenter. It takes courage to speak in public, but even more courage to speak candidly and openly.

Program path

Some of the topics we explore in this course include overcoming stage fright and anxieties about public speaking, creating persuasive narratives that engage your audience, and recognizing opportunities to connect with your audience emotionally. You will also learn about mastering best practices that maximize your impact as a presenter, setting the right tone to command attention without turning off your audience, and using your voice effectively to breathe life into your presentation.

Training method

The Core program is a blended learning journey that forms the foundation for your skills. Relevant for professionals who are new to a skill and are ready for an in-depth learning experience. It is a 11-week program where you will receive ongoing support by a facilitator. During the 11 weeks you will get 1 day of group training, virtual peer coaching and online learning sessions.
